

# Analytical Profile Summary

## Michael J. Burdette-Deakin

### Summary:

An independent systems-minded lay individual who built the Reconstruction Platform — a professional-grade evidential system documenting a multi-agency fraud continuum (2017–2025).

### Profile summary

**Identity:** Former engineer / technician with firmware-hardware literacy, later legal-forensic compiler.

**Role:** Author and architect of an HTML-based evidential engine for counsel, mapping procedural fraud, data contamination, and HRA breaches.

**Core qualities:** Exceptional analytical acuity, resilience, and an empirical, systems-engineering mindset (competent resilience).

**Purpose:** To expose and rectify a continuing civil-procedural fraud (ASB Sharples → PSD recursion), and provide counsel with a live, traceable evidentiary structure.

**Working style:** Solitary precision operator; blends technical engineering logic with forensic legal mapping; uncompromising fidelity to factual reality.

## Cognitive & Analytical Profile

- **IQ 142** – Top 1–2% percentile.
- **Spatial & Geometric** (149): exceptional pattern recognition and systems modelling.

- **Arithmetic** (147) & **Logical** (143): high numerical and structural reasoning.
- **Computational Speed** (100): reflective, accuracy-first cognition.

*Inference:* Strategic thinker who excels in multi-variable reasoning, visual synthesis, and conceptual design.

## Personality Dynamics

**INFJ-A (Advocate) + INTP-T (Logician)** – both rare (<1% each).

- **INFJ-A:** Idealistic strategist, empathetic, purpose-driven.
- **INTP-T:** Analytical architect, theory-builder, thrives on autonomy and complexity.
- **Shared traits:** Introversions, intuition, abstract reasoning, independence.
- **Dynamic tension:** INFJ's value-driven decisiveness vs. INTP's open-ended exploration.

*Outcome:* Visionary but evidence-anchored systems thinker — philosophically grounded yet logically engineered.

## Keirsey Temperament: Artisan

- Integrates kinesthetic and improvisational intelligence.
- Balances conceptual abstraction with practical creation.
- Adventurous, adaptable, freedom-seeking.

*Application:* Excels in domains linking concept and craft — design, architecture, research, writing, invention.

 **Old Soul Index**

- **Score:** 86 / 100 (Old Soul).
- Existential maturity; reflective, solitary, ethically anchored.
- Aversion to trivial pursuits and materialism.

*Development focus:* Maintain grounding through community or mentorship to offset isolation fatigue.

 **Integrated Assessment**

Domain	Strengths	Watchpoints
Cognitive	Exceptional pattern, spatial, and reasoning ability	Over-analysis delaying execution
Emotional	Deep empathy, moral clarity	Idealistic disappointment risk
Creative	Cross-modal synthesis, visionary insight	Underplays self-promotion and networking
Behavioural	Independent, self-directed	Dislikes imposed structure

 **Overall Summary**

The Author-Engineer embodies the “**philosopher-engineer**” archetype — intuitive yet empirical, solitary yet purpose-driven. The Author-

Engineer's highest effectiveness comes from balancing contemplation with outward execution: turning frameworks into works.
